Faik Catibusic

Founder at Ozon

Summary

Faik is a problem solver at heart, passionate about crafting software, who loves to introduce cutting-edge technologies to new and legacy projects alike. He is capable of complex software system design and is actively involved in their implementation. Lately, he has focused on the design and development of micro-services architecture and transformation of monolithic systems into ones based on micro-services.

Experience

Ozon

Founder

October 2019 - Present

Automated ranking system for job applicants based on experience extracted from CV and cross-referencing with the target position.

73lab

Founder

August 2019 - Present

Apres

Advisor & Co-Founder

March 2018 - Present

Sarajevo School of Science and Technology

Lecturer

2016 - Present

Sarajevo, Bosnia and Herzegovina

CSIS 280 - Object-Oriented Programming

CS 450 - Independent software development project

Toptal

Senior Software Engineer

April 2015 - Present

Ant Colony

Co-Founder

September 2016 - July 2019 (2 years 11 months)

Bosnia and Herzegovina

Academy387

Lecturer

June 2014 - December 2015 (1 year 7 months)

First App in 10 days is course on iOS development with Objective-C and Xcode 6. It's designed for those that are already familiar with programming and want to start building iPhone apps.
